

Provincial Court of Newfoundland and Labrador – Business Continuity Plan

Business Continuity Planning is an emergency planning process that enables the Court to continue essential services in the event of a disruption. An All Hazards Plan has been developed to provide the Court with a flexible, adaptable framework to enable an effective response to a wide range of disruptions.

The main goals of the plan are to;

1. Maintain/preserve the rule of law
2. Continue the Court's essential functions and operations
3. Minimize risks to the health and safety of the public, staff and judiciary
4. Reduce or minimize property damage and loss
5. Protect essential facilities, equipment, and records
6. Recover and resume normal operations.

The plan includes preparation for modified or reduced services to the public depending on the effects a disruption might have on our staff, the public and other groups such as lawyers, police and sheriff's officers. This website, along with the public media, will be used to convey Plan and Alert Updates and will be updated as necessary. Please check here regularly for further announcements and information.
